SUMMARY

UX leader with deep experience architecting and scaling complex, multi-product systems. Known for bringing structure to ambiguity, unifying fragmented workflows, and enabling cross-functional teams to deliver with clarity and consistency. Skilled at building lightweight processes, elevating collaboration across design, engineering, and product, and creating modular frameworks that support long-term scalability. Actively exploring the practical application of AI to improve work environments—focusing on augmenting human agency, removing systemic friction, and enabling teams to operate more effectively in evolving, AI-enabled systems.

EDUCATION

Internet Design & Technology, MSP Certificate — San Francisco State University, CA

Graphic Design, College Castello Sforzesco — Milan, Italy

Industrial Design, ISIA (Istituto Statale Industrie Artistiche) — Milan, Italy

::: PROFESSIONAL EXPERIENCE :::

✦ J.P. MORGAN CHASE

VP, User Experience Design

Palo Alto, CA
2022 – Present

Promoted to Manager while serving as Experience Lead across App Management and Secure Software Supply Chain—balancing IC work, team leadership, stakeholder alignment, and delivery planning across evolving product areas.

- o **Built a cohesive**, high-performing UX team by introducing clear structure and consistent design practices that improved alignment and execution quality.
- o **Delivered the new Pipelines redesign**—including six critical workflows—in record time, resolving major usability gaps and shaping the new Engineering Portal for 40,000 developers through strong user validation.
- o **Embedded research-driven** decision-making across product areas, integrating recurring user studies, CAB insights, and cross-collaboration to inform prioritization and strategy.
- o **Scaled the team from 4 to 11** (designers, researchers, writers) while maintaining IC and Experience Lead responsibilities.
- o **Led applied exploration of AI in the workplace** to shift focus from monitoring developers' productivity to identifying and removing systemic blockers, empowering human agency, and team effectiveness.

Recognition: 2023–25 for leading cross-functional teams as part of the annual Innovation Sprint program.

✦ JOHN MUIR HEALTH (rebadged to Optum)

Lead, User Experience

Walnut Creek, CA
2013 – 2022

Served as the end-to-end UX lead and primary cross-functional partner across product, engineering, and clinical teams.

- o **Delivered patient-facing tools**—including telehealth, virtual visits, urgent care scheduling, symptom checker, and secure account workflows.
- o **Rapidly scaled designs during COVID** to preserve access and continuity of care.
- o **Designed the first unified patient portal** for the UCSF–JMH Accountable Care Network, integrating clinical data across multiple EMRs with plan and claims information.
- o **Designed a responsive SSO-enabled physician portal** consolidating calendars, communications, training materials, and account management into one workflow.
- o Co-led a **cross-department research initiative to optimize care-operations** workflows—recognized for identifying cost-effective, patient-friendly improvements.

Recognition: 2017 Research Award · 2020 Superhero Award · 2022 Emerging Leaders Program.

✦ SYMANTEC

Principal, User Experience

San Francisco, CA
2010 – 2013

Led strategic UX for Symantec's flagship Data Loss Prevention product, driving high-impact cross-product initiatives and reframing core workflows in a rapidly shifting security landscape.

- o **Reframed the mental model of Symantec DLP**—replacing a costly, channel-based “case folders” approach with an identity-centric design. Through user research and technical collaboration across PM and engineering, defined scalable cross-channel correlation workflows (endpoints, network, storage) that unified the remediation experience and reduced architectural complexity.
- o Led the **cross-product integration of DLP and Data Insight**, aligning global teams and validating workflows with enterprise customers.

Recognition: Speaker at Cutting Edge (2012: Gamification for Enterprise; 2013: Can UX be Agile?).

VOLUNTEERING

2016–2019 · Co-led STEAM and design-thinking programs for children (8–12) at local Walnut Creek Library.

2017–2020 · HRO Ambassador, promoted High Reliability practices across the JMH healthcare system.

2021 · Led a 6-month design engagement with Earn & Learn, supporting underserved students in work-based learning.

2019–2022 · Co-organized virtual social programs during COVID, sustaining morale and connection across remote teams.

2023 · Ideated and engaged in networking activities to launch JPMC's first Women in Design community.

2024–Present · Founded PAX, the Palo Alto UX group to strengthen design culture and collaboration.

CORE COMPETENCIES

Design Leadership & Strategy • User Experience Design • UX Research • Information Architecture • Interaction Design

Systems Thinking • Workflow Modeling • Multi-Product Integration • Problem Reframing • Complex Workflow Simplification

Design Operations • Agile Delivery • Design Systems • Prototyping • Usability Testing • Cross-Functional Collaboration

✦ PIE DIGITAL

Manager, User Experience

San Francisco, CA

2009 – 2010

Joined as the company's in-house UX lead to unify fragmented agency-delivered concepts into a coherent product ecosystem across multiple surfaces and user types.

- **Unified four agency-built concepts** (kiosk, desktop app, browser app, and CSR tool) into a coherent multi-channel product ecosystem.
- **Led usability studies, workshops, and cross-functional sessions** to streamline the setup experience for the "Pie Box."
- **Delivered implementation-ready specifications** balancing branding consistency with technical feasibility.

Recognition: Praised for transforming fragmented assets into a cohesive, scalable experience.

✦ INTERNATIONAL ASSET SYSTEMS

Manager, User Experience

Oakland, CA

2008 – 2009

Brought in as the company's first UX lead to translate a complex multi-hub re-architecture into an integrated, modular platform for global logistics customers.

- **Consolidated five legacy logistics applications** across multiple hubs into a unified, modular platform.
- Developed cross-application task flows, reusable interaction patterns, and the company's first design system—**reducing development time** by 50% and enabling clients to adopt services iteratively.
- Conducted field research with logistics partners (drivers, depots, ocean carriers) to **synthesize complex workflows** into intuitive UI models.

Recognition: Commended by the Chief Architect for converting a deeply technical re-architecture into a clear UX vision.

✦ MIRIXA

Manager, User Experience

Emeryville, CA

2006 – 2008

Joined to assess whether the MTM SaaS platform needed evolution or a full redesign; ultimately led a complete rebuild under a four-month timeline.

- **Directed the end-to-end redesign** of the MTM platform, restructuring workflows for pharmacists and introducing UX discipline into an engineering-driven environment.
- Launched a streamlined platform that **doubled new clients in the first week** and significantly improved user experience for pharmacy teams.

Recognition: Awarded by the COO for Outstanding Work.

✦ MARCOLE

Creative Director

Walnut Creek, CA

2000 – 2006

Joined as the company transitioned from kiosk-only C++ systems to pioneering the first web-based Gift Registry experience—bringing an in-store, hardware-bound workflow online for the first time in the industry.

- Designed the **first-generation browser-based B2C/B2B** gift registry platform, transforming a kiosk-driven workflow into an intuitive online experience.
- **Reduced a ten-step registration flow to three steps**, increasing conversion from ~40% to over 80%.
- **Built modular reusable components** and W3C-compliant templates.

Recognition: Best Interface Design Award Runner-Up (Gift RegistryWorks / Kiosk Magazine Awards).
